### **DETAILED ACTION**

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR ' 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR ' 1.821 through 1.825 because it lacks any submission of a paper copy of the sequence listing for the specification. It is noted that applicants have stated that this application contains a paper copy sequence listing, but a diligent search of the file has failed to reveal such a copy. Applicant(s) are given the same response time regarding this failure to comply as that set forth to respond to this office action. Failure to respond to this requirement may result in abandonment of the instant application or a notice of a failure to fully respond to this Office action.

The computer readable form sequence listing has been requested to be transferred from the parent application serial number 09/312,172.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 13-21, 101, and 103-106; drawn to pH dependent ion exchanges matrices, classified in class 422, subclass 68.1
- II. Claims 86-98, 102, and 107; drawn to methods of making a pH dependent ion exchange matrix, classified in class 422, subclass 68.1.

The inventions are distinct, each from the other because of the following reasons:

The inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be

Art Unit: 1631

shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product of Group I may be made by the distinct method of synthesizing the ion exchange ligand precursor step by step on the solid phase of the matrix rather than as provided already assembled as in the claims of Group II. Thus, an undue search burden exists for searching both the Group I invention with various methods of making of which the Group II method is only one.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)). The CM1 Fax Center number is either (703)308-4242 or (703)305-3014.
